Subject: Endorsement of the Earth Charter

Hereby, **LES** endorses the **Earth Charter**. LES embraces the spirit, vision, and aims of the Earth Charter. Additionally, LES pledges to join the global partnership for a just, sustainable, and peaceful world and to work for the realization of the values and principles of the Earth Charter.

LES' mission and goals are in line with the Earth Charter. Indeed, LES' mission is to co-create and enhance sustainability on a global scale, where social and ecological values are put first and are foremost important, rather than economic gain. In other words, LES *Inspires, Stimulates, and Motivates* to lead together to More: to co-create and stimulate the shift from ego centered societies to eco (people and planet) centered societies. Profit is seen as one of the tools to stimulate this shift. This mission is put in practice through research, consultancy, project management, presentations, education, and coaching.

LES promotes the Earth Charter and puts it in practice through its own activities, focusing on the people and planet side of sustainability (equality, biodiversity, nature, peace, and human development). Additionally, LES placed a banner of the Earth Charter and this endorsement on its own webpage.

Yours sincerely,

Lavinia Warnars,

Owner & Founder of LES
